PROFILE

Mixed-methods researcher with 7+ years of experience designing and executing studies that turn complex data into clear, actionable insights. Fluent in both qualitative methods (in-depth interviews, usability studies) and quantitative analysis (survey design, statistical modeling, large-scale data analysis in R and Python). Proven track record managing multiple client relationships simultaneously and translating research findings into stakeholder-ready reports and recommendations. Now bringing this toolkit to consumer insights in industry.

EXPERIENCE

Postgraduate Associate for Academic Integrity

Liberal Arts Instructional Technology Services

August 2022 – September 2025

The University of Texas at Austin

- Analyzed stakeholder needs and designed research-informed solutions across a portfolio of 7–10 faculty clients per semester, driving tool selection, study design, and policy development for 15 online courses.
- Designed and executed mixed-methods analyses of exam-taking data across 150+ assessments per semester, translating findings into weekly narratives and analytical memos that drove measurable policy change.
- Influenced university-level policy decisions by synthesizing research findings into clear recommendations for college leadership.
- Coached faculty clients and college leadership on the value and application of research findings, translating complex results into actionable recommendations that shaped university-level policy.
- Built and maintained internal tracking systems and longitudinal databases across semesters to monitor program performance and surface trends over time.

Assistant Instructor

Department of Linguistics

January 2020 – August 2022

The University of Texas at Austin

- Designed a full-semester curriculum for mixed audiences, building and iterating on 34 lectures and 14 assessments based on student performance data and feedback.
- Identified recurring comprehension gaps through 1:1 student sessions and assessment patterns, informing course design adjustments and developing applied intuition for how non-experts encounter and process unfamiliar concepts.

Graduate Research Scientist

Department of Linguistics

August 2017 – August 2024

The University of Texas at Austin

- Designed and administered 5 large-scale mixed-methods studies, combining survey research (binary and Likert-scale), in-depth interviews, and corpus analysis across independent projects.
- Managed and analyzed an 890-million-token database, performing classification, statistical modeling, and data visualization in R; presented findings at 2 professional conferences.
- Applied advanced statistical methods (linear mixed-effects models, planned comparisons) to behavioral data, translating outputs into accessible findings for non-specialist audiences.
- Led qualitative interview research across 4 projects, synthesizing participant insights with quantitative data to build richer, more actionable conclusions.

EDUCATION

The University of Texas at Austin

Doctor of Philosophy in Linguistics

August 2017 – August 2024

Northwestern University

Dual B.A./M.A. in Linguistics

August 2012 – June 2016

SKILLS AND TOOLS

Research Methods

Survey design, Qualtrics, in-depth interviews, mixed-methods research, experimental design

Analysis & Statistics Stakeholder & PM

R (lme4, emmeans, dplyr, ggplot2), Python, SQL, SPSS, data visualization
Research roadmap management, multi-client portfolio management, executive reporting, cross-functional collaboration

Language

English (native), Modern Hebrew (fluent)
